Bilkent University Computer Engineering Department

MSc and PhD Programs

Prof. Dr. Ibrahim Korpeoglu

Research Areas

- Algorithms, artificial intelligence, big data, bioinformatics, cloud computing, computational biology, computational geometry, computer architecture, computer graphics, computer networks, computer vision, cryptography, data mining, data science, data security, database systems, graph visualization, high performance computing, image analysis, information retrieval, machine learning, mobile systems, parallel and distributed systems, pattern recognition, performance evaluation, scientific computing, virtual reality.

Applications

- Application Deadlines:
  Nov 2, 2020
- Online Application:
  https://stars.bilkent.edu.tr/gradapp/
- Requirements for application:
  - CGPA ≥ 2.80 / 4.00
  - ALES (Turkish citizens) or GRE (Foreign applicants)
    - ALES: Quantitative ≥ 55 (for MS), 80 (for PhD w/o BS)
    - GRE: Quantitative ≥ 153 (MS), 157 (PhD)
  - English Proficiency: TOEFL (IBT) ≥ 87 or
    IELTS avg ≥ 6.5 (and min 5.5 in each section)
  - And YDS ≥ 55 (for Turkish citizen applying PhD).

Interview

- Date: Close to end of November 2020
  - We will inform applicants about interview dates
- If not uploaded during online application, hard copy documents to be submitted during interview:
  - Transcript
  - ALES or GRE score report
  - Proof of English Proficiency
    (TOFLE, IELTS or YDS report)

Acceptance requirements

- Grad committee approval
- At least one faculty member willing to work with the applicant towards thesis
- Passing the interview, and department approval
- Graduate School of Engineering and Science approval

Scholarship Options

- Department scholarship
  - Tuition waiver (100%)
  - Stipend (paid by Department)
  - Eligibility to accommodate in dormitories or University housing
  - Health Insurance
  - Office (shared)

Scholarship Options

- TÜBİTAK Scholarship or TÜBİTAK projects
  - Tuition waiver (100%)
  - Stipend (paid by TÜBİTAK)
  - Eligibility to accommodate in dormitories or University housing
  - Accommodation financial aid from University
  - Health Insurance
  - Office (shared)
  - Bilkent spending Card (for PhD students)

Scholarship Options

- Project grants (other than TÜBİTAK projects)
  - Tuition waiver (100%)
  - Stipend (paid from the project budget)
  - Eligibility to accommodate in dormitories or University housing
  - Health Insurance (paid from the project budget)
  - Office (shared)
- Graduate School scholarship
  - Tuition waiver (80 %)

Degree Requirements

VAROL AKMAN

http://www.cs.bilkent.edu.tr/~akman

akman@bilkent.edu.tr.NOSPAM

My current research is two-pronged

1. Contextual reasoning in AI
2. Social aspects of the Internet, esp. twitter

Contextual reasoning in AI

Problems originating from natural language processing and understanding, especially those caused by the lack of explicit context:

- When we say a particular thing, we do so in a context. Thus, there are embedded background assumptions available only through the context. We are also good at shifting between contexts. Can context be formalized in a formal framework? This would lead to improved software not only in NLU but also in knowledge-based systems, robotics, search engines, and personal assistants like Siri, Cortana, OK Google.

My grad course CS 578 (Natural Language Processing) examines contexts, as well as numerous other NLP topics.

Social aspects of the Internet, esp.

Problems caused by tensions between local versus global, individual versus corporate, and democratic versus authoritarian in the framework of the Internet. More specifically:

- Basic concepts and history of the Internet as a socio-political medium. Free access to information in the networked world. The Internet as a trusted communications medium in light of security and privacy issues. Censorship and politics of the Internet vis-à-vis interventions by oppressive governments. Social movements in the 21st century marked by rapid broadcast of ideas and images.

My grad course CS 513 (Implications of the Internet) treats such societal aspects of the Internet. I'm especially interested in **twitter** as a political medium.

Projects

- Discovery and characterization of genomic variation
  - Funded by EU Marie Curie Actions Career Integration Grant
- Algorithms and hardware designs for ultra-fast mapping of HTS reads to reference genome assemblies
  - Funded by US National Institutes of Health
- De novo and hybrid (multi-platform) sequence assembly.
- Genomic repeat discovery, classification and annotation.
- Distributed algorithms for genome assembly.

Positions available. Contact if you have B.Sc. or M.Sc. degree in computer science, computer engineering, electrical engineering, or mathematics, and if you are interested in combinatorial optimization, approximation algorithms, and graph theory. Strong programming skills in C/C++ are highly desired.

Successful applicants will also have a chance to contribute to many international consortiums such as the 1000 Genomes Project and the Genome 10K, and will involve in other international collaborations with researchers in Vancouver, Seattle, Barcelona, Bari, Pittsburgh, and more.

Basic understanding of biology/genetics/genomics is a *plus*, but **not required**.

A. Ercument Cicek

cicek@cs.bilkent.edu.tr

cs.bilkent.edu.tr/~cicek

My research focuses on building algorithms for analyzing biological data using various biochemical networks. Even though it took 13 years and ~$1b to sequence the first genome, right now, it takes a day and ~$1k. This has resulted in accumulation of vast amounts of information. Consequently, biosciences have faced the problem of “big data”. Today, the bottleneck in the bio-research is the lack of computational power and algorithms that can efficiently analyze the data and make discoveries. Central dogma in molecular biology dictates the information flow from DNA -> RNA --> Protein --> Metabolite. Each layer introduces 20k, 100k, 1m, and 3k variables respectively. The search space for even a basic pattern discovery is clearly intractable. I design machine learning algorithms that use biological networks to prune the search space and discover biomarkers in particular for genetic Diseases.

Metabolic Networks to Understand Cancer

Metabolites are the small compounds in the body and have been found to be key biomarkers to define certain tumors.

We use network algorithms and build online systems that analyze metabolic signatures in tumors and understand the differences within the subtypes of the same cancer.

Web Databases and Search Engines

- Social Web search and personalization
- Domain-specific search engines
- Efficiency and scalability issues for Web Search Engines (caching, index pruning)
- Web information extraction
- Modeling and querying of Web resources
- XML querying & searching

Search Engines are the key to access Web Data

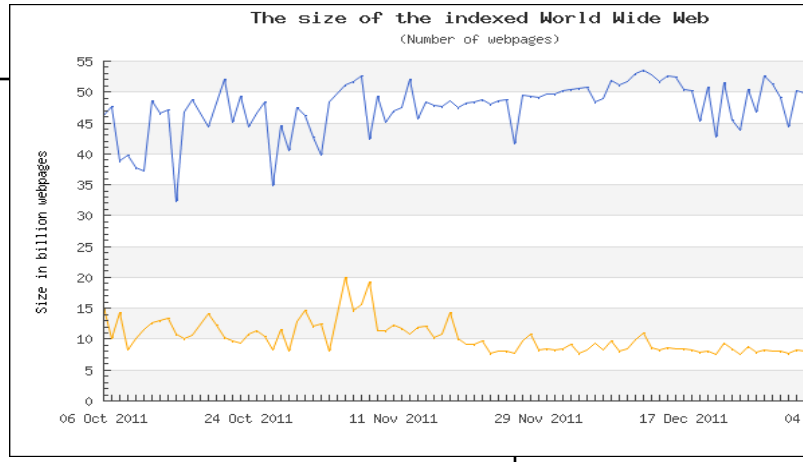
1995 S. Brin meets L. Page

1998 Birth of Google

2000 First **billion-URL** index
The world's largest!
≈5000 PCs in clusters!

2004 Index grows to **4.2 billion** pages

2008 Google counts **1 trillion** unique URLs



2009 TBs or PBs of data/index
Tens of thousands of PCs

1995 — 2015

Efficient and scalable strategies are of vital importance !

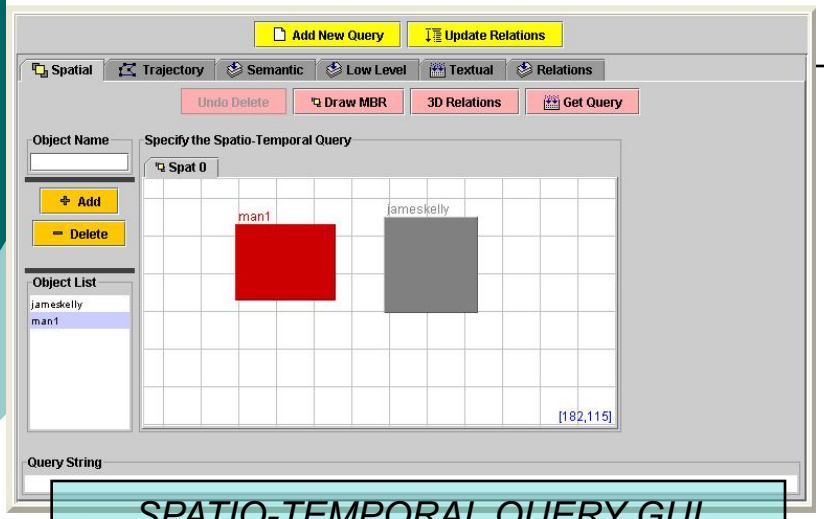
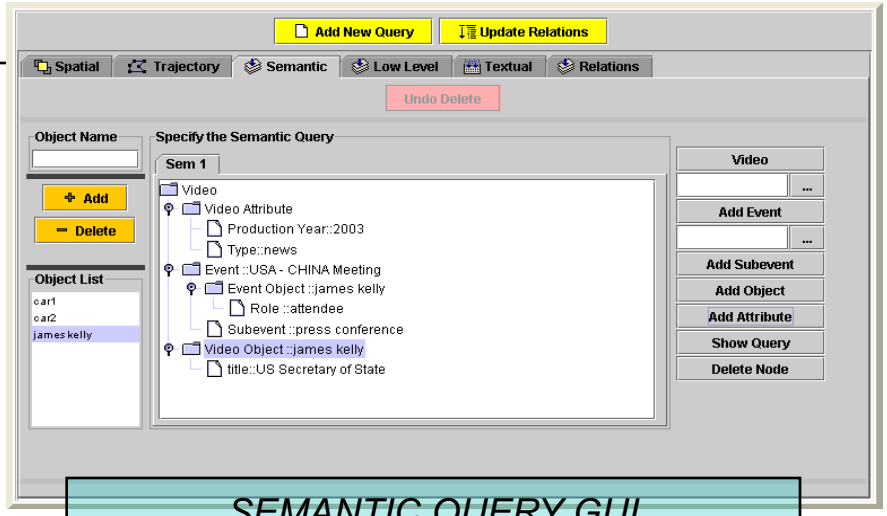
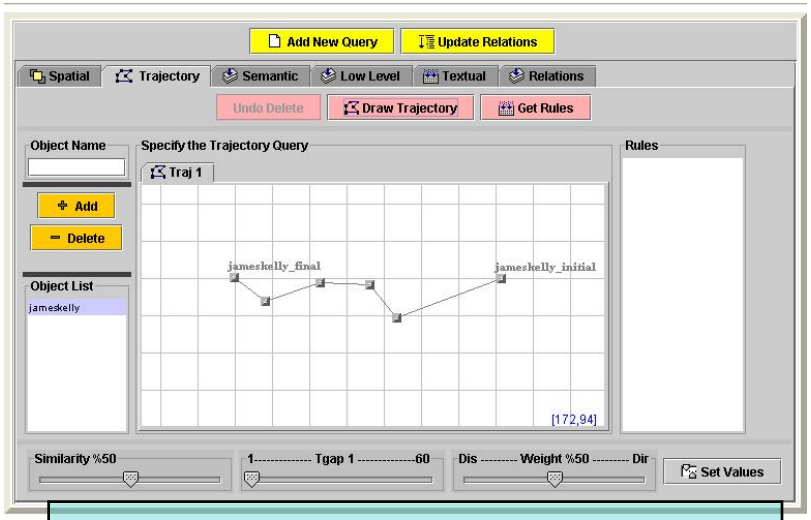
BilVideo: Integrated video DBMS supporting low-level, spatio-temporal, motion and semantic querying of videos



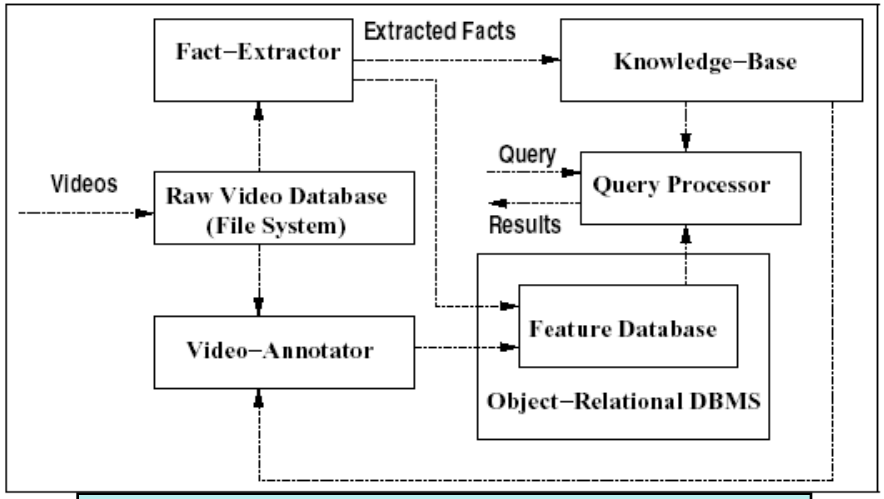
SPATIO-TEMPORAL QUERY GUI



SEMANTIC QUERY GUI

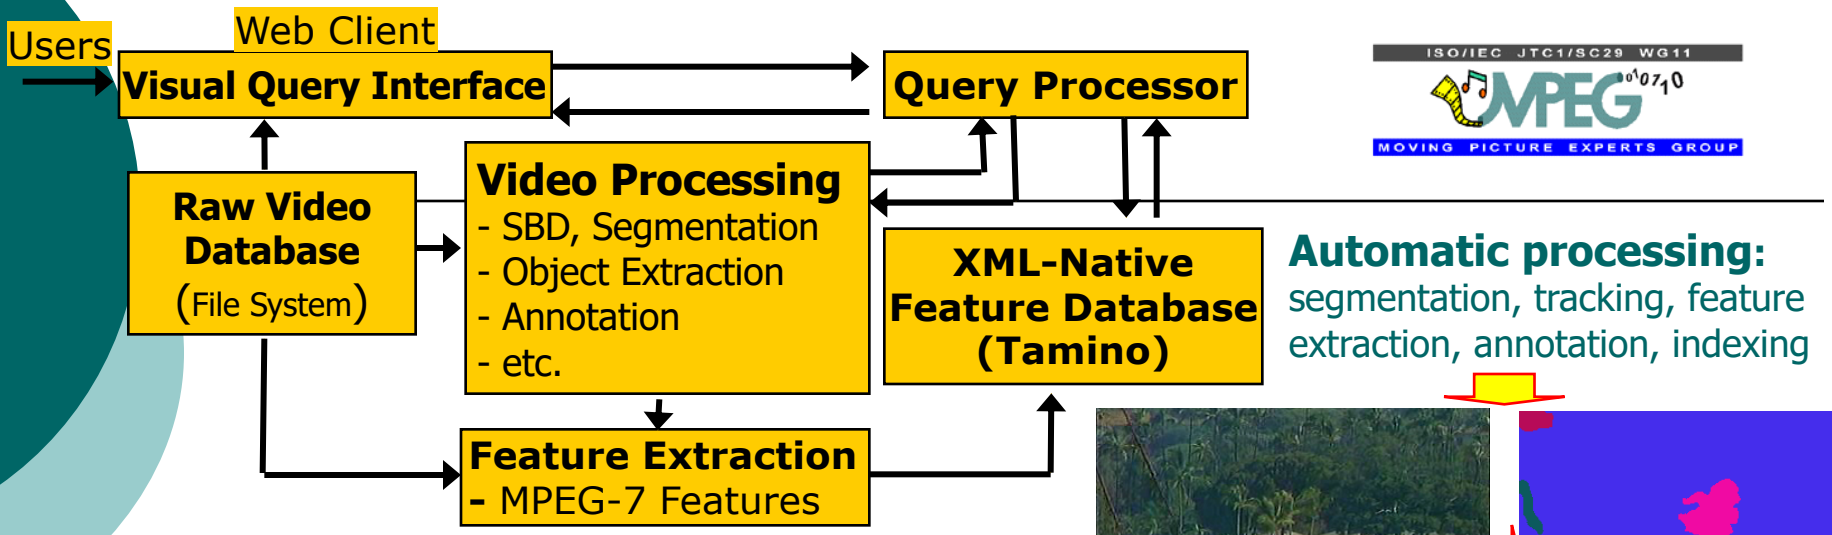


TRAJECTORY QUERY GUI



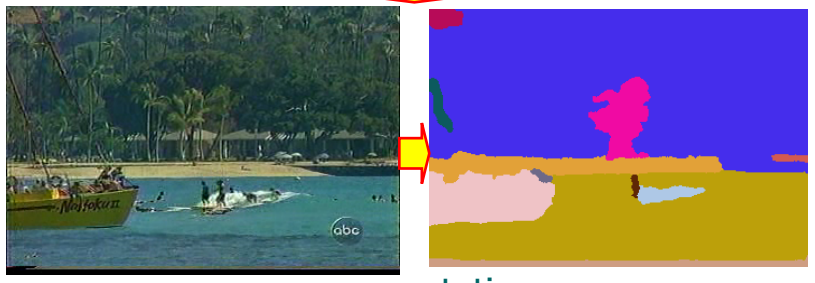
SYSTEM ARCHITECTURE

BilVideo-7: An MPEG-7 Compatible Video Retrieval System



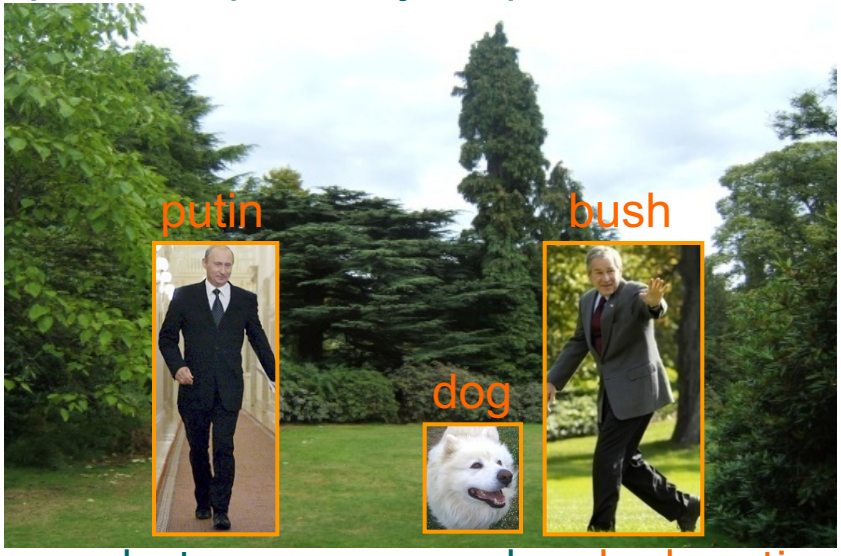
ISO/IEC JTC1/SC29 WG11 MPEG MOVING PICTURE EXPERTS GROUP

Automatic processing:
segmentation, tracking, feature extraction, annotation, indexing



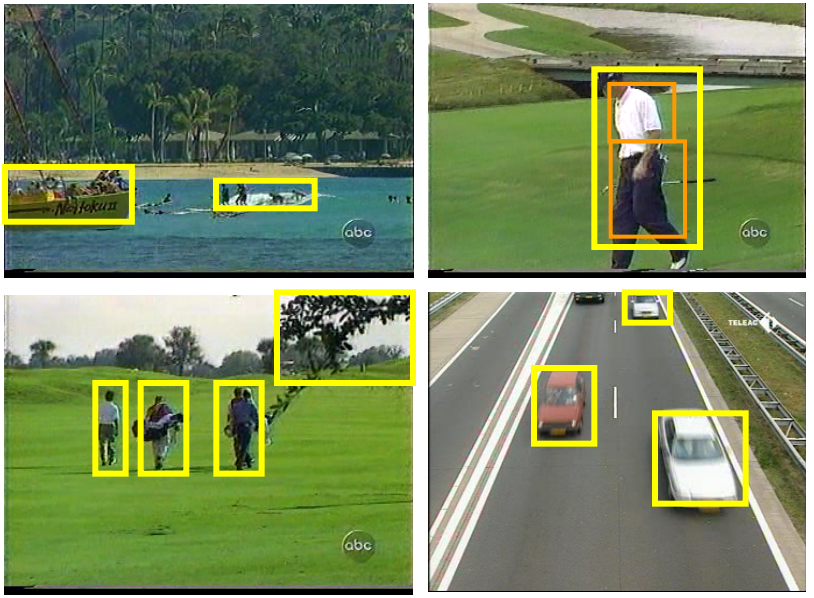
segmentation

Powerful querying capability for video data
- keyword and content-based queries
- spatio-temporal object queries



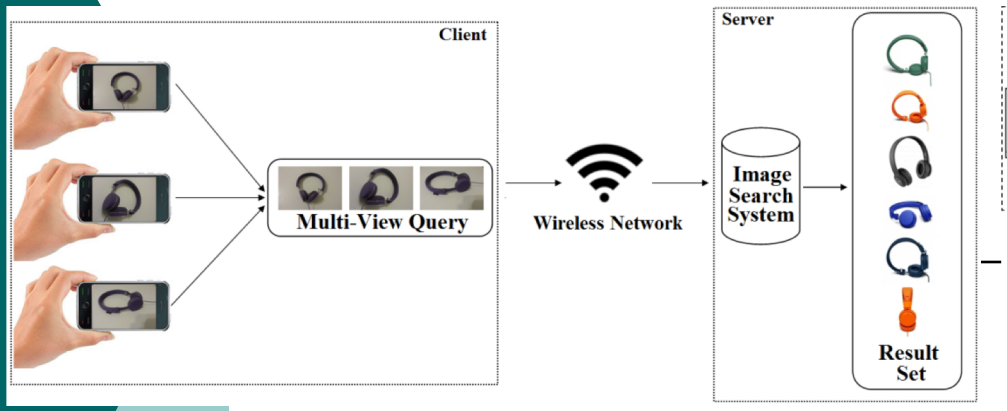
Example query formulation

keywords: trees, greenery, sky – bush, putin, dog

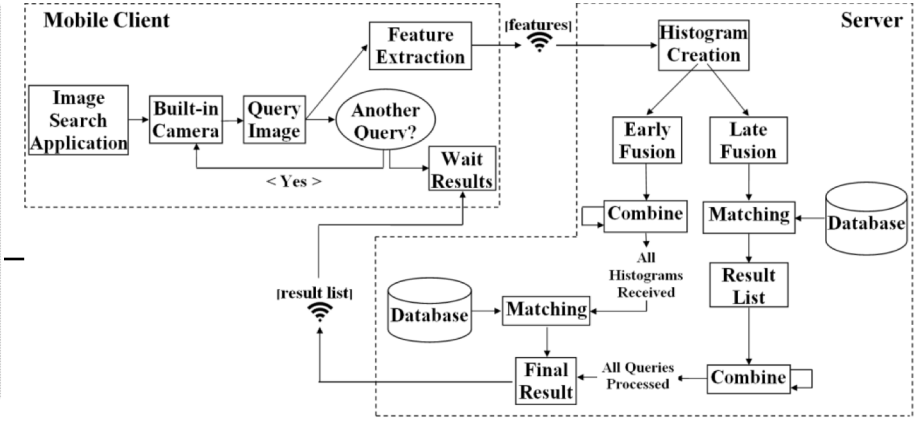


Salient video object extraction

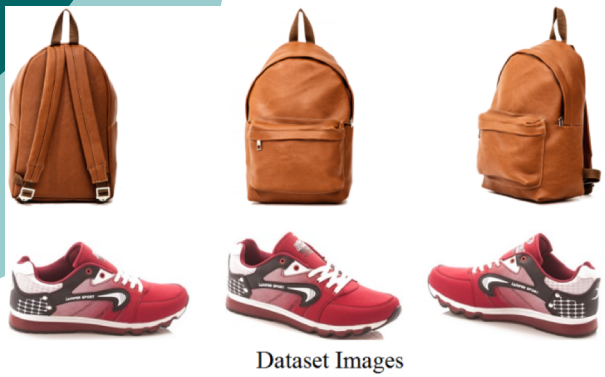
Mobile Image Search Using Multi-Image Queries



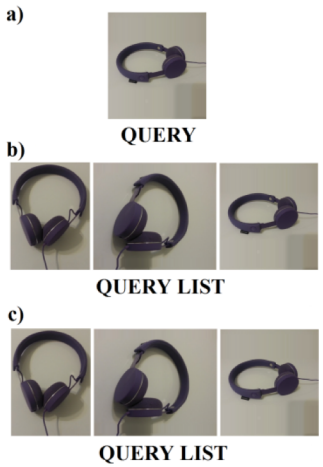
Workflow of the Search System



Early and Late fusion methods



Multi-View Dataset and Queries



Single (a) and multi-view queries and corresponding result lists using early (b) and late (c) fusion methods.

Big Data and Social Network Analysis

- **Social Network Data Analysis on Big Data Processing Platforms**
  - **Development, implementation and evaluation of algorithms/methods to process/analyze social network data for various social network problems.**
