

CS 319 Object-Oriented Software Engineering *0 – Introduction*

Eray Tüzün, Phd

e-mail: eraytuzun@cs.bilkent.edu.tr

Investment Advice 🤗

My assumptions and expectations

Proficient in any programming language, but you have limited experience in analysis or design of a system

CS 201

Wants to be a Software Engineer /wants to learn

Internship experience? (poll)

For Team project

Being a committed team member

Feedback / Class Participation

Share your thoughts

Ask questions – wave your hand forcefully (~~just unmute your mic and talk~~) to get my attention

If there is something you do not understand -- ASK!

There are no stupid questions!!!!

If you have a relevant comment, experience, anecdote --
SPEAK!

Participation will make the class better!!!!

During Lecture...

- ~~Please open up your webcams~~
- Try to concentrate
- Participate (Ask questions / Interact)
- ~~No recording~~

Logistics

- Github (Code)
- Google docs (Documentation)
- Visual Paradigm (UML models) / PlantUML
- ~~Zoom (for classes and term project group meetings)~~
- Polleverywhere (for polls)
- **Slack for peer learning and group formation**
 - Make sure you are already logged in ...
 - https://join.slack.com/t/cs319-bilkent/shared_invite/zt-23bmlqwsy-kPYkL-3grCmQmclYXevbLQ

Your Expectations

What are your expectations of the course?

What do you want to learn?

...

Please go to <https://pollev.com/erayt350>

And express your opinion...

Granularity of Software

Trivial: <1 month, 1 programmer, 500 LOC

Ex: Intro programming assignments

Very small: <3 months, 1 programmer, 2000 LOC,

Ex: Course project

Small: <1 year, 3 programmers, 50K LOC,

Ex: Mobile App

Medium: 3 years, 10s of programmers, 100K LOC

Ex: Optimizing compiler

Large: 5 years, 100s of programmers, 1M LOC,

Ex: MS Word, Excel, Linux, Windows

Very large: 10 years, 1000s of programmers, 10M LOC

Ex: Tesla, Air traffic control, Telecommunications, space shuttle

Granularity of Software

What is the difference between a programmer and a software engineer? I am asking for a friend

The terms "programmer" and "software engineer" are often used interchangeably, but there are some differences in the skillset and responsibilities they typically have. A programmer is a person who writes code, whereas a software engineer focuses on the design, development, testing, and maintenance of software. A software engineer generally has a broader range of skills and may be involved in the full software development life cycle, while a programmer is typically more specialized in writing code.

Analogy with Bridge building

- Over a stream – easy, one person job
- Over river Nile ... ? (The techniques do not scale)

Large-Scale Software-Engineering

Project involves a team of people – need to manage process, people and artefacts

System takes a long-time to build – need to plan

Systems are complex – need powerful tools, methods and technologies

Need to reuse code/designs/process

<https://www.havelsan.com.tr/en/sectors/defense-and-security/air/strategic-c2is/havelsan-ticcs>

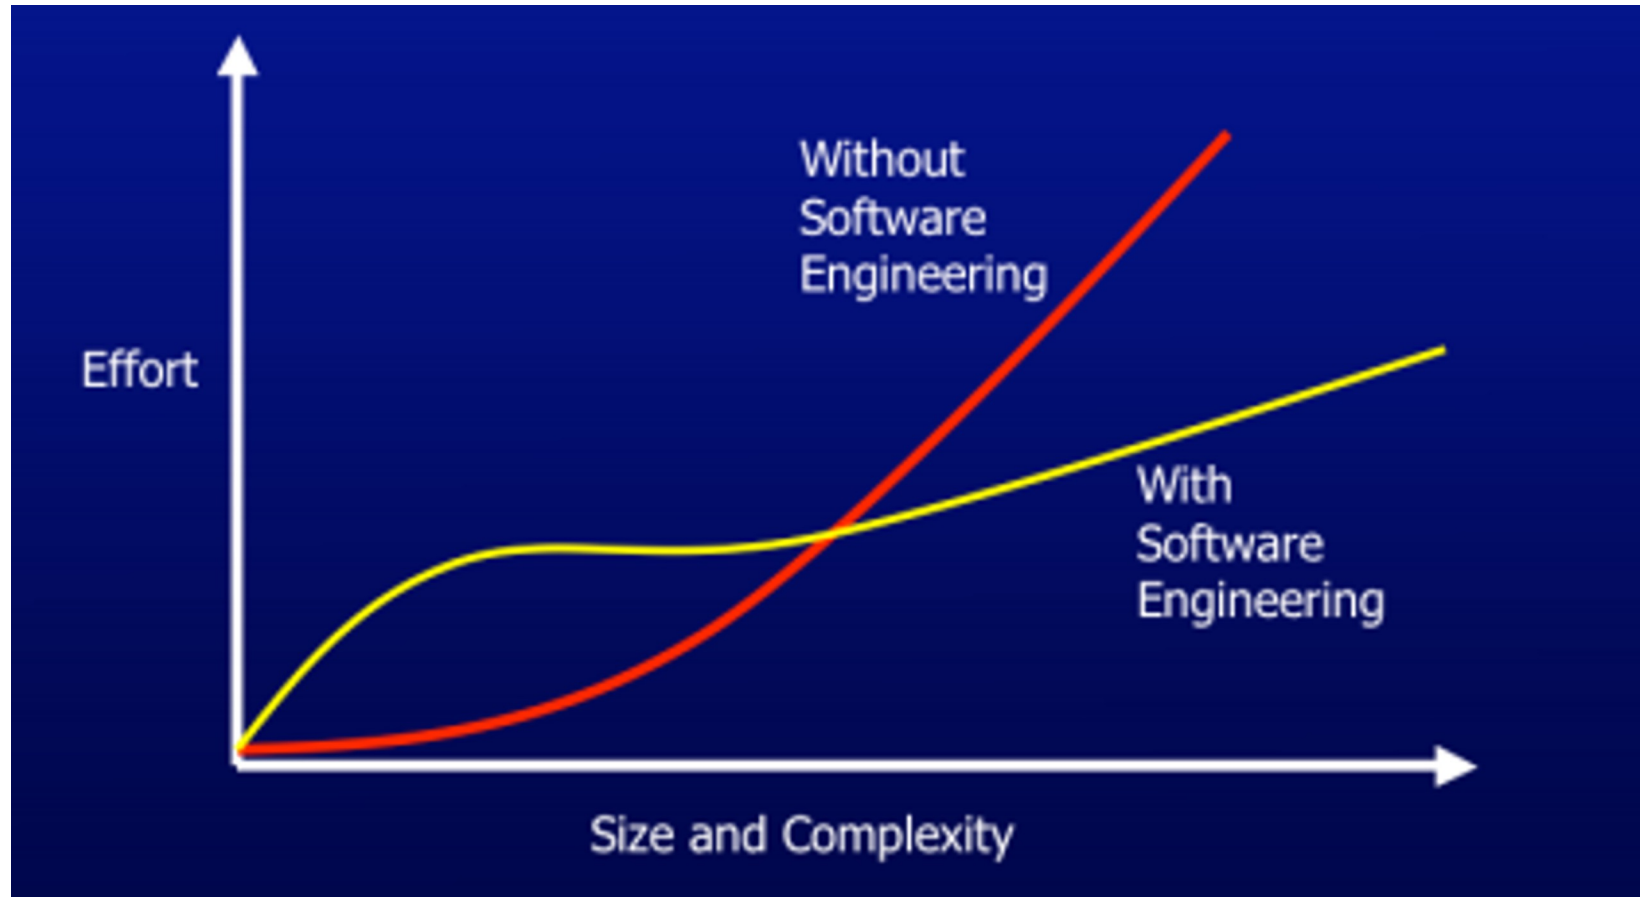

- ❖ > 300 Engineers
- ❖ > 10.000.000 LOC
- ❖ > 10 years!

- ❖ > \$100.000.000
- ❖ > 10.000.000 LOC

Effort, Software Size, & Complexity

Course Objectives

- Learn basics of the software engineering (SE) process life cycle.
- Learn what the object-oriented (OO) approach to software development is, through OO principles and design patterns.
- Learn UML (Unified Modeling Language) that is part of most CASE (Computer Aided Software Engineering) tools and the benefits of visual modelling / diagramming.
- Practice the application of principles of object-oriented software development through the course group project.
- Develop teamwork and communication skills through the course group project.

What will you really gain from this course?

YourCV ++

- UML
- Git
- Design Patterns
- Analytical Thinking
- Requirements Analysis and Design
- Visual Paradigm
- Slack

Programming vs Software Engineering (Programmer - > Software Engineer)

Building software from scratch

CV writing tips

Working with a group

Outline

Intro to SE (Chapter 1)

Modeling w/ UML (Chapter 2)

Project Organization and Communication (Chapter 3 Sections 3.1 – 3.3)

Requirements Elicitation (Chapter 4)

Requirements Analysis (Chapter 5)

System Design (Chapters 6 & 7)

Object Design (Chapters 8 & 9)

Mapping Models to Code (Chapter 10)

Testing (Chapter 11)

Contact Information

Weekly Schedule

Schedule of CS 319-001						
	Mon	Tue	Wed	Thu	Fri	
08:30 09:20	EE-412					
09:30 10:20	EE-412					
10:30 11:20						
11:30 12:20						
12:30 13:20						
13:30 14:20			EE-412			
14:30 15:20			EE-412 (S)			
15:30 16:20						
16:30 17:20						
17:30 18:20						
18:30 19:20						
19:30 20:20						
20:30 21:20						
21:30 22:20						

* Throughout the semester, we will be using the two-hours blocks, we will be cancelling few of the 2-hour blocks through out the semester.

Textbooks

Recommended - Textbook: Head First Design Patterns, 2nd edition, O'Reilly Media, 2020.

Required - Textbook: Object-Oriented Software Engineering, Using UML, Patterns, and Java, Bernd Bruegge and Allen H. Dutoit, 2010/3rd, Pearson

Grading (Tentative)

	Type	Total Contribution
1	Final:Essay/written	33
2	Project	45
3	Midterm	20
4	Attending project presentations	2

- Those students who fail to get a minimum of 17 out of 65 points will get an FZ
- Attendance is not mandatory except the final week.

Plagiarism

All individual assignments must represent your own work.

No collaboration is permitted during the quizzes, the final examination, the individual labs, and the assignments. Collaboration among team members is permitted for the term project.

Plagiarism is to take and use as one's own, or copy without acknowledgement, the works of another person. The provider of such material can be ruled equally culpable.

Term Project – 2020

* 5 teams per each game – First come first serve

Term Project 2021

- Classroom helper
 - Group formation
 - Peer review
 - Term project team member assessment
 - Reviewing the other's group work
 - You are expected to extend the requirements after the requirement analysis
 - **Best group's software will be used next semester.**
- Tools
 - Documentation: Google docs
 - Source control: Github

Term Project Fall 2021

- Pandemy Manager for University
 - Managing HES codes/ Vaccine & PCR status
 - Keeping track of quarantine status of students
 -
 - You are expected to extend the requirements after the requirement analysis
- Tools
 - Documentation: Google docs
 - Source control: Github

Term Project Fall 2021

- Student Club Manager
 - Managing activities
 - Managing users
 - Announcements, events ...
 -
 - You are expected to extend the requirements after the requirement analysis
- Tools
 - Documentation: Google docs
 - Source control: Github

Term Project 2022 Spring

- **Gym Management System (For Bilkent University)**
 - Gym reservation
 - Field reservation
 - Scheduling courses
 - ...
- **Health Center Management System (For Bilkent University)**
 - Doctor appointments
 - Medical history
 - Handling COVID status, vaccines etc.
 - ...

Team Project 2022 Fall

- Erasmus Application Manager
 - <https://w3.bilkent.edu.tr/bilkent/outgoing-students/>
 - <http://www.cs.bilkent.edu.tr/~exchange/>
 - http://www.cs.bilkent.edu.tr/~exchange/exchange_faq.html

Customer : Can Alkan and Ayşegül Dündar

Team Project 2023 Spring

- Internship Management System
 - <http://www.cs.bilkent.edu.tr/~staj/staj.html>
 - http://mf.bilkent.edu.tr/?page_id=844

Customer : Faculty of Engineering (Dean and Department chairs)

Team Project 2024 Fall

selamm ben yeni mezun oldum ve evimi boşaltıyorum. beyaz eşya, yatak, kütüphane ve türevi mobilyalarımı beni sokakta aç bırakmayacak şekilde elden çıkarmak istiyorum letgo harici ilan atabileceğim veya bilkentliler için 2. el eşyaya adanmış bir bağlantı var mı onu sormak istedim 🙄 tabii ilgilenen birileri varsa iletişime de geçmeyi isterim şimdiden teşekkür ederimmm

gizli olabilirse bir de...

Hayrına elimdeki phil/hum kitaplarını kullanacak birine vermek istiyorum kütüphanemde boş duracağına, bazı yerlerin altları çizili ufak notlar falan var ama orjinal üçü de. Plato/Republic, Homer/The Illiad ve John Locke/Second Treatise of Government. Orjinal olmayan Rousseau's Political Writings ve Hobbes Levatian da var.

Team Project 2024 Fall

"CampusConnect: Your University's Social Marketplace"

Welcome to CampusConnect, the exclusive social network designed exclusively for your university community! Whether you're a student, faculty member, or staff, CampusConnect is your go-to platform for all things related to **second-hand sales, lost and found items, borrowing, and donations**, and so much more... *

- Strictly Bilkent only network (Back to local social networks again? Harvard, 2004 Facebook)
- Carefully analyze your competitors; Instagram (Bilkent_itiraf_ediyor), Facebook, LetGo
- Your job is to prioritize the needs and requirements.
- We will select the best term project group (among around 35 groups) and help them commercialize their idea in 2024.

* ChatGPT was used to create portions of this slide 😊

Term Project

EVERY GROUP PROJECT

VIA 9GAG.COM

DOES 99%
OF THE WORK

HAS NO
IDEA WHAT'S
GOING ON THE
WHOLE TIME

SAYS HE'S
GOING TO
HELP BUT
HE'S NOT

DISAPPEAR
AT THE VERY
BEGINNING AND
DOESN'T SHOW
UP AGAIN TIL
THE VERY END

IN SCHOOL YOU HAVE EVER DONE

Working on a team

- Agree on rules
- Agree on a plan
- Start right away
- Meet regularly
- Pull your weight
- Hold each other accountable
- Report problems ASAP

Project grade will be adjusted by 360-degree peer evaluations and contribution report

Key to Success

Ninety percent of your work's outcome will depend on the team you select to work with.

Find the right people

Be a team player

Be nice!

Key to Success

If you are the smartest person in the room, you are in the wrong room.

Tentative Schedule

Week	Activity	Deliverable
1 (W37)	Course Overview , Chapter 1	
2	Chapter 1, Group Formation	Team Selections
3	Chapter 2 UML	D0- Github Readme
4	Chapter 4	
5	Chapter 3	D1- Use Case / NFR / Tech Stack
6	Chapter 5	D2- Sequence / Activity / Class Diagrams / Mockup / wireframes
7	No Class	
8 (W44)	Midterm	
9	Chapter 6	D3- Early Prototype
10	Chapter 7	D4- Design Goals High Level arch.
11	Chapter 8, Design Patterns (Tutorial)	D5- Class Diagram Design Patterns
12	Chapter 8	
13	Chapter 9, 10	
14	Chapter 11	D6- Source Code / Build Instr. / User Manual / Peer Review
15 (W51)	Final Report and Presentation	D7- Presentations

Term Project

- In at most 1 page, give a rough description of what you intent to implement. Discussion with the TA about your project is highly recommended.
- Come up with a rough scope for your software. Certain changes throughout the semester are welcome and expected.
- Start to form up your teams (More info after the add-drop period)
- The teams will have either 5-6 members. No cross-section groups are allowed.
- Start researching the requirements

Project Description

Submit a Project Description (GitHub Readme)

1. Project title?

2. Team members?

3. [300-word minimum] Description: A brief description of your proposal

- What is the **motivation** ?
- What are the **goals** ?
- What important **problem** will the web app solve?
- What sorts of **features** will the web app have?
- What are the **selling points** of the web app?
- What make this web app **interesting/cool**?

Weekly status reports / worklogs

1. Report on progress and issues

What you did, what worked, what you learned, where you had trouble, and where you are stuck.

What did you do last week? (By individual team members)

Any blockers?

2. Outline your plans and goals for the following week

What is your plan for next week? (By individual team members)
