

Honor Code Statement

CS 101 Algorithms and Programming I

In the Computer Engineering Department at Bilkent University, we take the academic integrity on all kinds of assignments very seriously and expect you to take it seriously too. The aim of this document is to make our expectations as clear as possible to prevent possible academic integrity violations.

Sometimes students may want to work together and get help from others when they struggle. However, any form of collaboration in quizzes, lab assignments, midterm and final examinations is forbidden. These are the means for us to measure your abilities for the courses that you will take in the following semesters. The following rules will be forced in CS 101 Algorithms and Programming I:

-You are allowed to look at your notes and books during quizzes. But, you are not allowed to talk or exchange any form of information.

-You are allowed to look at your notes and books during labs. You are also allowed to ask for help from the Teaching Assistants (TAs). The amount of help that a TA can give you depends on the nature of your question. But you are not allowed to talk or exchange any form of information with your classmates or any other person. Both the giver and receiver of such information are deemed to be equally guilty. You are not allowed to leave your code in publicly accessible areas during lab hours. You are not allowed to share computers in any way. Use of any tools of communication including e-mail and chat is forbidden.

-Use of cellular phones during class, lab, and exam periods is forbidden.

-You may not rely on any assumptions about these rules. Do not rely on the experience of your friends or your experience in other courses. If you have any questions, you must ask them to your TA or instructor.

-Do not forget that it is much honorable to explain a poor grade to others than to explain a disciplinary penalty.

-Any action contrary to the rules listed above will result in a disciplinary investigation.

As a student of CS 101 course, I have read this document and fully understood my responsibilities.
